

## **NEW AWARD OF A SULPHUR RECOVERY UNIT IN SWEDEN**

- Technip KTI: contract signed with Nynas AB to build a new Sulphur Recovery Unit for the Nynas Refinery in Nynashamn, Sweden
- EPCC Lump-Sum Turnkey contract: value approximately € 49 MN
- Project Completion: expected by June 2012

*Rome, 23 June 2010* – **Maire Tecnimont** announces that its operating subsidiary, **Technip KTI S.p.a.**, has signed a contract to realize a new Sulphur Recovery Unit for the Refinery of **Nynashamn, Sweden**. **Nynas AB** is a worldwide leading producer of Naphtenic Oils and Bitumen/Asphalts, with production facilities in Europe, North and South America and maintains offices in more than 30 countries. The project, which is executed on a Lump-Sum Turnkey contract basis for approximately **€49 million**, foresees the provision of engineering, procurement, construction and commissioning (“EPCC”) services. The completion is scheduled for June 2012.

The project consists of the development of a Sulphur Recovery Unit producing 24 t/d of liquid sulphur, with a Tail Gas Treatment section applying the proprietary RAR (Reduction Absorption Recycle) technology, which was licensed by Technip KTI to Nynas in 2008. The project includes the plant offsite facilities, as well as the expansion of an existing substation and the interconnecting piping with the upstream units.

This contract is concrete evidence of Technip KTI’s consolidated position as an internationally recognized Contractor in the Sulphur Recovery Sector. Furthermore, the project confirms the positive cooperation record of Technip KTI with Nynas, which has been consolidated in the past few years. Technip KTI has already been awarded the Basic Design, FEED and EPCC development of a new 15,000 Nm<sup>3</sup>/h Hydrogen Production Plant, which is now undergoing Commissioning; the company was also selected as Process Licensor for the Sulphur Recovery Unit.

**Maire Tecnimont SpA**

Maire Tecnimont S.p.A. is the parent company of an Engineering & Construction international industrial group which operates in three sectors: Oil, Gas & Petrochemicals; Power; and Infrastructure & Civil Engineering. Today, the Group, quoted on the Milan Bourse, is present in approximately 30 countries, currently controls over 40 operative companies and can rely on a workforce of approximately 5,000 employees, more than half of whom are located abroad. At 31 December 2009, the Group reported Revenues of €2,164 million and Net income, after minorities, of €77 million. For further information: [www.mairetecnimont.it](http://www.mairetecnimont.it)

**Technip KTI SpA**

Technip KTI, headquartered in Rome, acquired in May 2010 by Maire Tecnimont, is an international process engineering company with over 35 years of experience in the design and realization of plants for the chemical, petrochemical and refining industries. Technip KTI also operates as a provider of proprietary technologies and as EPC contractor for medium-sized plants and has realized over 500 projects throughout the world, with significant references in the fields of sulfur recovery and gas processing, in hydrogen and syngas production, as well as in high temperature furnaces for refineries and petrochemical plants.
